PROFESSIONAL SUMMARY

Ambitious AI & ML student currently pursuing B.Tech in Computer Science & Engineering (CSM) with practical experience in frontend development, machine learning, deep learning, and data visualization. Skilled in building responsive, user-friendly interfaces using HTML, CSS, JavaScript, and Figma, alongside developing AI/ML models for predictive analytics and automation. Seeking a challenging internship to apply technical skills in real-world problem-solving.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML), St. Martin's Engineering College | [2025– 2028]

Diploma – Artificial Intelligence & Machine Learning, Samskruti College of Engineering | CGPA: 7.89

SSC, Zilla Parishad High School | CGPA: 8.5

TECHNICAL SKILLS

Programming & Scripting: Python, SQL, HTML, CSS, JavaScript
Frontend Development: Responsive Web Design, Figma, JavaScript, HTML5, CSS3
ML/DL Frameworks & Libraries: TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
Backend Tools (Basic Knowledge): Django, Django REST Framework
Web Scraping & Automation: Selenium, BeautifulSoup
Tools & Platforms: Git, VS Code, Postman
Machine Learning & Deep Learning: Supervised Learning, Unsupervised Learning, Neural Networks, CNNs, RNNs

PROJECTS

Frontend Development:
- E-commerce Websites – Designed and developed frontend interfaces (vaihitagreenharvest.com, rajsarepalli.in) using HTML, CSS, JavaScript; implemented responsive layouts and optimized user experience.
- Agency Website (VDT) – Built responsive frontend for an agency website with interactive

UI elements.
- Fest Horizon – Event registration system with admin dashboard (Django-based).
Machine Learning & Deep Learning:
- Customer Churn Prediction – Implemented classification models to predict customer churn for improved retention.
- Property Price Prediction – Built regression models to estimate property values using housing datasets.
- Early Disease Detection – Developed ML models for early health condition detection.
- GenAI Lyric & Course Explainer Models – Created AI-generated content tools using NLP and generative models.
- Telegram AI Chatbot – Integrated AI-based chatbot with Telegram using Python.
- Taxi Rental App – Contributed to ML component integration in a Django REST + React Native mobile app.
- Live Traffic Predictor – Developed deep learning model for real-time traffic congestion forecasting.

CERTIFICATIONS

Generative AI Bootcamp (6 weeks) – Internshala: AI image generation, Telegram bot integration

Machine Learning (8 weeks) – Internshala: Supervised & Unsupervised learning, Data Analysis

LANGUAGES

English – Professional Proficiency

Hindi – Professional Proficiency
