PROFESSIONAL SUMMARY

Ambitious AI & ML student currently pursuing B.Tech in Computer Science & Engineering (CSM) with practical experience in frontend development, machine learning, deep learning, and data visualization. Skilled in building responsive, user-friendly interfaces using HTML, CSS, JavaScript, and Figma, alongside developing AI/ML models for predictive analytics and automation. Seeking a challenging internship to apply technical skills in real-world problem-solving.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML)	St. Martin's Engineering College | [2025– 2028]
Diploma – Artificial Intelligence & Machine Learning	Samskruti College of Engineering | CGPA: 7.89 [2022-2025]
SSC	Zilla Parishad High School | CGPA: 8.5 [2022]

TECHNICAL SKILLS

Programming & Scripting:

- Python
- SQL
- HTML
- CSS
- JavaScript

Frontend Development:

- Responsive Web Design
- Figma
- JavaScript
- HTML5
- CSS3

ML/DL Frameworks & Libraries:

- TensorFlow
- Keras
- Scikit-learn
- Pandas
- NumPy
- Matplotlib
- Seaborn

Backend Tools (Basic Knowledge):

- Django
- Django REST Framework

Web Scraping & Automation:

- Selenium
- BeautifulSoup

Tools & Platforms:

- Git
- VS Code
- Postman

Machine Learning & Deep Learning:

- Supervised Learning
- Unsupervised Learning,
- Neural Networks
- CNNs
- RNNs

PROJECTS

E-Commerce Website – VeggExpress | Aug 2025 https://veggexpress.in/

- Developed production-level frontend using Figma, HTML, CSS, and JS.
- Implemented responsive design and enhanced UX; used Canvas for image designs.

E-Commerce Website – Raj Sarepalli | Jun 2025 https://rajsarepalli.in/

- Designed and coded frontend with Figma, HTML, CSS, JS; integrated interactive elements.

Smart Traffic Map – Hackathon Project | Feb 2025

- Built intelligent traffic map for commuters with real-time congestion data analysis.
- Tech stack: Python, APIs, Machine Learning, Flutter

E-Commerce Website – VDT Agency | Aug 2025

- Built responsive frontend for an agency website with interactive UI elements. **Event Organizing Website – Fest Horizon** | Feb 2025 https://clg-fest.onrender.com/
- Developed frontend using Figma, HTML, CSS, JS, and Canvas; integrated admin dashboard using Django.

Warehouse Robot Project | APRIL 2025

- Designed autonomous warehouse robot using ESP32, L298N motor driver, 4WD kit, AS5600 encoder, IR sensors, TC A9548A I^2C multiplexer, and BMS.
- Handled coding, data logging, and component integration; presented functionality with PowerPoint.

Customer Churn Prediction | Oct 2024

- Implemented classification models to predict customer churn; performed data cleaning and feature engineering for improved model performance.

Property Price Prediction | Oct 2024

- Built regression models for estimating property values; conducted exploratory data analysis on real estate datasets.

Early Disease Detection | Oct 2024

- Developed ML models using Logistic Regression and other classifiers for early health condition detection.

Credit Card Fraud Detection | Oct 2024

- Collected and preprocessed transaction datasets; built models to detect fraudulent transactions.

Generative AI Model – Course Explainer | Sep 2024

- Developed AI model using Boltiot API keys to generate course explanations in simple language.

E-Commerce Website – Vaihita Green Harvest | Aug–Sep 2024 http://www.vaihitagreenharvest.com

- Developed production-level frontend using Figma, HTML, CSS, JS, and Canvas for images.

Taxi Rental App | 2024

- Contributed ML integration in a Django REST + React Native mobile app.

Telegram AI Chatbot | 2024

- Developed AI-based chatbot integrated with Telegram using Python.

Live Traffic Predictor | 2024

- Built deep learning model for real-time traffic congestion forecasting.

CERTIFICATIONS

Generative AI (6 weeks) – Internshala [Aug 2024 - Sep 2024]: AI image generation, Telegram bot integration

Machine Learning (8 weeks) – Internshala [Sep 2024 - Oct 2024]: Supervised & Unsupervised learning, Data Analysis

Industrial Training – Nacharam Industrial Project Division (May 13 – Oct 31, 2024): Trained in identifying traffic signals and road signs using AI with Python and cloud computing. Worked with SQL modules for data management and analysis, contributing to real-world smart traffic system applications.

LANGUAGES

English – Professional Proficiency
